

Providing service to the  
**Road Transport Industry**

Ireland's largest independent  
multi-metals stockholder

# Delivering Customer Service, Investing in Capability

The Aalco stock of products for the Road Transport Industry is expanding rapidly, making Aalco the fastest growing supplier to this sector. Whatever you require: a single length of aluminium extrusion; flooring in aluminium, stainless, wood or laminate; GRP sheet; Dropside systems, through to complete body kits – Aalco can supply quickly and efficiently. Please call your local service centre for information, advice, prices and delivery times.

Aalco is the UK's largest independent multi-metals stockholder. Customers from every sector of UK manufacturing and engineering industry, whether small local businesses or large multinational corporations, benefit from a cost-effective single source for all their metals requirements:

- An inventory that includes aluminium, stainless steel, copper, brass, bronze in all semi-finished forms
- Comprehensive processing services providing items cut and/or finished to customer requirements
- Eighteen locations bringing local service to every corner of the UK
- Ongoing investment in technology and logistics to ensure on-time delivery

No order is too large or too small and Aalco offers a responsive and competitive service for supplying anything from single item orders to major JIT contracts, tailoring this service to the individual needs.

Whatever your requirement, in whatever quantity, your local Aalco service centre is ready and willing to satisfy your needs. For a quotation, for further information, more extensive technical information, advice on product selection or to place an order, please contact your local Aalco service centre or refer to the web site:

The information contained herein is based on our present knowledge and experience and is given in good faith. However, no liability will be accepted by the Company in respect of any action taken by any third party in reliance thereon.

As the products detailed herein may be used for a wide variety of purposes and as the Company has no control over their use, the Company specifically excludes all conditions or warranties expressed or implied by statute or otherwise as to dimensions, properties and/or their fitness for any particular purpose. Any advice given by the Company to any third party is given for that party's assistance only and without any liability on the part of the Company. Any contract between the Company and a customer will be subject to the Company's Conditions of Sale. The extent of the Company's liabilities to any customer is clearly set out in those Conditions; a copy of which is available on request.

#### WEIGHTS

All weights shown in this publication are for guidance only. They are calculated using nominal dimensions and scientifically recognised densities. Please note that in practice, the actual weight can vary significantly from the theoretical weight due to variations in manufacturing tolerances and compositions.

## Anti-Slip Phenolic Mesh Flooring

Aalco stocks a wide range of 100% European Birch, FSC certified anti-slip plywood products offering customers a much improved choice for their RT flooring needs.

Our anti-slip flooring features quality European birch plywood in which veneers are bonded with phenolic "weather and boil proof" glue lines throughout known as WBP plywood. The anti-slip face is produced with a heavier weight of phenolic film or multi layer special film pressed with a patterned platen (MESH, HEXA or TRANS) to create a slip-resistant surface.

We recognise that today's market offers many different anti-slip flooring panels and they often differ in quality. Aalco wants to give its customers the assurance that each batch delivered comes from the same source and will meet your quality expectations. Original Aalco Flooring panels can be recognised by the RT logo (left) printed on the smooth side of the panels.

### Benefits

- **Slip Resistance**  
The patterned film face provides slip resistance and a hard-wearing surface. Taber Test results (A11) show the range of results/options available.
- **Predictable Performance**  
Tight Quality Control in selection of materials and manufacture ensures consistent performance.
- **Stability**  
The high temperature pressing of 1.4mm thick birch veneers together with the thick film face gives long life and wear resistance.
- **Film Faced Reverse**  
The smooth film face on the reverse provides protection from damp environments.
- **Environmentally Friendly**  
Our anti-slip plywood is FSC certified.

### Guidance For Installation

- **Re-sealing of Cut or Drilled Areas**  
Our phenolic anti-slip plywoods are edge sealed at the factory. For long life, all cut edges and drilled holes must be sealed before fixing. Water entering unsealed areas can cause localised swelling and reduce the service life of the plywood.
- **Fixings**  
Galvanised or stainless steel fixings will resist corrosion and unsightly damage to the board.
- **Mechanical Support**  
Adequate mechanical support will prevent excessive flexing of the board in service and reduce the possibility of fracturing the phenolic coating.
- **Regular Maintenance**  
The boards require minimal maintenance in normal use. However, removal of any build-up of dirt and algae on the mesh surface will prevent reduction of slip resistance.

## AalcoMesh

**AalcoMesh** is a top quality, mesh-patterned birch plywood panel that has been most commonly available on the market for many years. With very good slip and wear resistance and a long life the **AalcoMesh** pattern remains the most popular choice for many RT flooring applications.

Sheet Size (mm)
1220 x 2500
1220 x 3050
1500 x 3000
1525 x 3050
1525 x 2440
1525 x 3300

Thickness available:  
9mm – 30mm

## Aalco HexaGrip

**Aalco HexaGrip** offers an improved slip and wear resistance combined with a decorative appearance of hexa pattern. Quality birch plywood overlaid with 220g/m<sup>2</sup> phenolic film to the face, backed with 120g/m<sup>2</sup> balancer, makes **Aalco HexaGrip** an excellent RT flooring panel.

Sheet Size (mm)
1220 x 2500
1220 x 3050
1500 x 3000
1525 x 3050
1525 x 2440
1525 x 3300

Thickness available:  
9mm – 30mm

## AalcoTrans

**AalcoTrans** is a solution for demanding RT flooring applications where anti-slip properties and high wear resistance are the most desired factors. Manufactured in Europe, **AalcoTrans** offers the durability of birch plywood combined with the special, hard wearing thick multi layer film with the imprinted waffle (square) pattern which offer one of the highest Taber Value on the market, over 10,000 rounds (based on independent lab test).

Sheet Size (mm)	Thickness (mm)	Weight per Sheet (kg)
1220 x 2500	18	43
1220 x 2500	24	48

The above sizes are stocked in the standard dark brown with 220g/m<sup>2</sup>. Other options: cut size, CNC machining, T&G, different film grammages and colours, special construction available on request. Original Aalco Flooring panels can be recognised by the RT logo imprinted on the smooth side of plywood. Plywood without logo is also available on a forward order basis.

## Technical Data

● **Product**

Phenol film faced plywood in which film is applied by hot pressing

● **Structure**

Cross built construction plywood

● **Material**

European birch plywood, FSC certified

● **Covering**

*AalcoMesh*

Dark brown phenol film

(anti-slip side 220g/m<sup>2</sup>, reverse 120g/m<sup>2</sup>)

*Aalco HexaGrip*

Grip - dark brown phenol film

(anti-slip side 220g/m<sup>2</sup>, reverse 120g/m<sup>2</sup>)

*AalcoTrans*

Black hard wearing multilayer film

(anti-slip side thick multilayer, reverse 120g/m<sup>2</sup>)

Acrylic, water resistant paint for painting of the edges – on request.

### Taber Test Value

Product	Film Thickness (mm)	Colour	Taber Test Value
Aalco Mesh	220g/m <sup>2</sup>	Dark Brown	600
Aalco HexaGrip	220g/m <sup>2</sup>	Dark Brown	600
Aalco Trans	special hard wearing film	Black	10400

● **Length and Width Tolerance**

Tolerance according to EN 315 ± 3.5mm.

### Thickness Tolerances (to EN 315)

Nominal Thickness (t) mm	Tolerance on Nominal Thickness (mm)	Tolerance Within One Panel (mm)
≥ 6.5 ≤ 25	+(0.2 + 0.03 t) -(0.4 + 0.03 t)	0.6
> 25 ≤ 30	+(0.0 + 0.05 t) -(0.4 + 0.05 t)	0.8
> 30	+(0.0 + 0.03 t) -(0.4 + 0.03 t)	

● **Squareness**

2mm / 1m.

## Quality Requirements

Categories of Characteristic	Range of Tolerance
Mat Spots	permitted up to 20cm <sup>2</sup> , up to a number 2pcs / 1m <sup>2</sup>
Scratch e.g. because of pressing plate	permitted occasionally
Cracks of film on middle of board or through board	not permitted
Defects at the edge of the panel due to cracks of film and parting	permitted up to 2mm from the edges
Streak, fogging colour on film surface	permitted
Visible unevenness because of the surface of the wood	permitted

ATTENTION! Sunlight exposure can change the colour of the film.

● **Distortion – cup, bow, twist**

In plywood up to 10mm thick distortion is not taken into consideration so the distortion is unlimited  
In plywood 10mm thick and thicker distortion is permitted up to 10mm / 1m of length.

● **Bonding quality**

Bonding quality acc. to PN-EN 314-2/class 3 (DIN BFU 100, BS 1203 WBP).

● **Formaldehyde release**

Class E1 acc. to PN-EN 636.

● **Moisture content plywood: 4-12%.**

(Other conditions can be agreed between the parties.)

## Approvals

● Aalco source this product range from one manufacturer, PAGED Sklejka S.A. in Poland, a leading European manufacturer of Plywood products with manufacturing processes and procedures conforming to all relevant standards

● The company's Integrated Management System is approved to **ISO 9001: 2008**

● Environmental Procedures are approved to **EN ISO 14001: 2009**

● Health & Safety Procedures are approved to **PN-N 18001: 2004**

● FSC Certified for Chain of Custody (CoC) to **FSC-STD-40-004 V2-1 October 2011**

## EGL Laminate

Edge Glued Laminate that with care can be crosscut and drilled to suit almost any size of floor.

- **Outers** – Keruing or Kapur for hardness
- **Inners** – Sepetir or mixed red hardwood for rigidity and lighter weight

**Profile:** Machined to half lap pattern with 'crusher bead' to allow expansion without distortion

**Width:** 305mm face / 319mm overall

**Thicknesses:** 22mm & 28mm

**Lengths:** Up to 45ft

**Standard lengths (feet):** 20, 25, 26, 28, 30, 45

**Weight per foot:** 22mm – 1.35kg / 28mm 1.9kg

## Keruing Half Lap Planking

- 150mm wide in two thicknesses – 22mm and 28mm
- Available in lengths from 16ft to 26ft
- Weight per linear metre is 3.2kg for the 22mm thick and 4.06kg for the 28mm thick

## VCA Approved Sideguard Kits

Aalco are delighted to introduce their new range of industry approved sideguard kits that meet the requirements of **Regulation 73**.

Please go to [www.aalco.co.uk/literature](http://www.aalco.co.uk/literature) to download a copy of the test results and approval documentation.

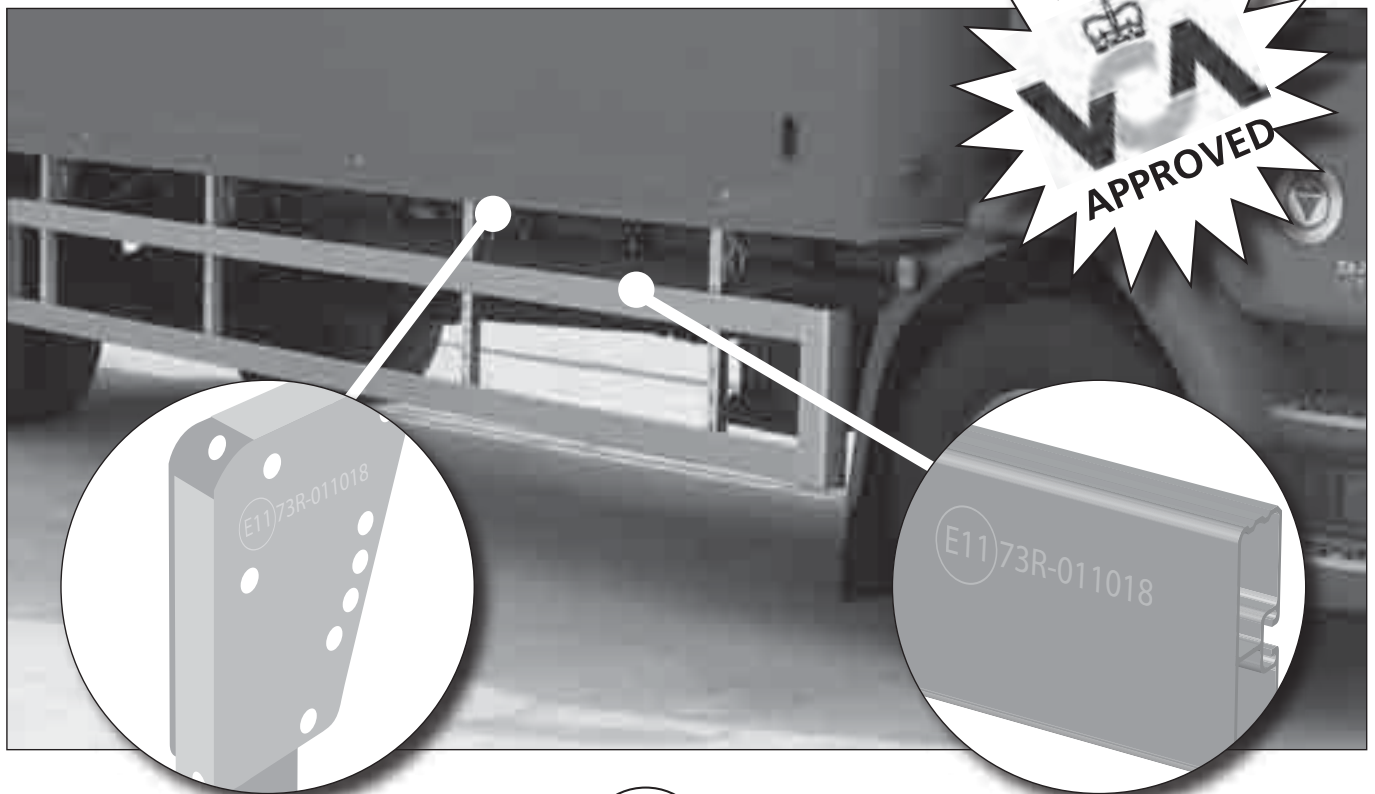

- Fulfils the mandatory requirements of whole vehicle type approval
- Legs and rail supplied fully marked 'E11 73R-011018'
- Tested and approved by VCA
- 'E' approval certificate available upon request
- Compliant fitting instructions available upon request
- Compliant stock NOW available

The VCA approved Aalco sideguard system comes in a range of 4 kits. Pivotal legs are available in 500mm and 740mm heights and the kits are suitable for either single or twin rail systems.

Aalco's exceptional standards of manufacturing, delivery, advice and service mean that you can be assured of the right parts for your requirements.

**Parabond 600** Sealant

## FC01 - GRP Roof Coil

2550mm wide x 1.3mm thick  
Available in Opal or Blue. 42 metre long coils that can be cut to any length then recoiled and packed for easy transportation.

## Aluminium Roof Coil

2550mm wide x 0.8mm thick.  
Available in full coil and cut to any length specified, then recoiled for easy transport and handling.

GRP flat and corrugated panels are produced on modern continuous lamination lines. The main ingredients are high quality polyester resins and glass fibre reinforcements that provide high mechanical strength properties to the product.

## Double-Sided Tape

### DS1619

White, high bond strength DS Tape for a wide range of applications. Bonds well to metals, plastics, etc.

### Technical specification

Product	Orthophtalic polyester resin and fibre glass
Fibre glass content	25 - 30%
Colour	Milk white
Light transmitted	Approx. 50%
Standard surface	Smooth / Smooth Smooth / Rough
Thickness	1.3± 0.19mm
Density	1.4-1.45 g/cm <sup>3</sup>
Service temperature	-40°C + 120°C
Tensile strength	> 50Mpa
Bending strength	80-90 Mpa
Modulus of elasticity	6000/7000 Mpa
Elongation of break	2%
Thermal lineal expansion coefficient	2.7 - 10 <sup>-5</sup> cm/cm°C
Barkol hardness	>40 barkol
Water absorption	0.2%
Heat transmission coefficient	5 Kcal/m h°C
Self-ignition temperature	480°C
Biological resistance	Perfect against micro-organisms, algae, mildew and fungus
Resistance to corrosion	Good resistance to general corrosion of chemical agents and sea water

### Dimensional tolerance

Unit weight	±10%
Average thickness	±15%
Width	±1%
Length	±1%

## Detaflex 4000

### Description

Detaflex 4000 is a high modulus, fast vulcanising, elastic surpaintable, one component polyurethane sealant for sealing and bonding in the automotive and truck industry. WRAS approved.

### Properties -Vulcanized sealant

Shore A Hardness (ISO 868)	40
Maximal joint distortion	25%
Modulus at 100% elongation (ISO8340)	0.38 N/mm <sup>2</sup>
Elongation at break (ISO8339)	680%
Temperature resistance	-40°C and +90°C

Detaflex 4000 has a good resistance against high and low temperatures -40°C to + 90°C. Complies with container "Butter Test" and approved to BS5929:Part3:1984.

### Joint Measures

Joint width	Joint depth	Allowed difference
3-4mm	4-5mm	1mm
6mm	6mm	1mm
8mm	6mm	1mm
10mm	8mm	2mm
15mm	10mm	2mm
20mm	12mm	2mm
25mm	15mm	2mm

### Processing temperature

Between +5°C up and +40°C

### Surfaces

All surfaces must be dry, clean and free from dust and grease. When necessary, degrease with Top Cleaner, MEK, alcohol or ethanol. If necessary, use primer. It is recommended that adhesion tests are carried out to determine the suitability of the product for its application. When in doubt, contact the technical support service.

### Available colours

White, grey and black

### Precautions

Contains Isocyanate. See information supplied by the manufacturer. Safety data sheet available for professional use on request. S23 Do not breathe vapour.

## Parabond 600

### Description

A high quality, fast curing universal adhesive sealant based on MS polymer with very high initial strength. Perfect for bonding and sealing of most materials on nearly all surfaces (porous or non-porous) in the automotive sector. Flexible adhesion to most common materials including wood, PVC, glass, mirrors, aluminium, stainless steel, copper.

### Characteristics

- High initial adhesion (high track) even without the need for clamping
- Fast build up of internal strength
- Excellent adhesion without primer, even on slightly damp surfaces
- Free of solvents and isocyanates
- The product is paintable
- Finished product keeps exceptional elasticity for extended period of time
- Does not corrode metals
- Can be applied indoors or outdoors
- High weathering and UV resistance
- Fungal resistant
- Guarantees exceptional strength after curing, for an elastic adhesive the force at break is exceptional : 18kg/cm<sup>2</sup>

### Packaging and colours

25 cartridges of 290ml per box  
Available in white, grey, black, dark brown and beige

### Pre-Bowed Aluminium Roof Sticks

**Material:** Aluminium  
**Weight:** 0.777 kg/meter  
**Availability:** 2500mm long with 25mm rise, ±5mm and is supplied flanges up or down.

**TH2**  
 Wt. 0.78 kg/m

### Steel Top Hat Roof Sticks

**Material:** 1.2mm Galvanised Mild Steel  
**Weight:** 1.12 kg/meter  
**Availability:** 2500mm long with 25mm rise, ±5mm and is supplied flanges up or down.

**GRS01 (Steel)**  
 Wt. 1.2 kg/m

### Steel Bowler Hat Roof Sticks

**Material:** 0.9mm Galvanised Mild Steel  
**Weight:** 0.78 kg/meter  
**Availability:** 2500mm long with 25mm rise, ±5mm and is supplied flanges up.

**BH01 (Steel)**  
 Wt. 0.78 kg/m

Roofsticks will normally be supplied pre-bowed with legs on inside radius  
 Can also be supplied pre-bowed with legs on outside of radius

17	9144	2438	290

### All GRP Panels

All panels fulfil the specifications of NF Standard NFT 57-950-1:2012

#### Tolerances:

Length: 0.1% (minimum 5m)

Width: 3mm

Thickness: 1mm

Diagonal difference: 6mm

## CPRV

This CPR panel with trapezoid shaped stiffeners is ideal for easy location of lashing rails.

### Applications

Van bodywork with lighter bodyweight and improved payloads, hire vehicles, furniture carriers.

### Thicknesses and weights

Thickness mm	30	32	35	38	41
Weight kg/m <sup>2</sup> CPRV6	7.8	9.0	10.8	12.6	14.4
Weight kg/m <sup>2</sup> CPRV4	11.0	12.2	14.0	15.8	17.6

### Dimensions

	CPRV6	CPRV4
Alu profiles every	610mm	406mm
Maximum length	13550mm	13550mm
Maximum height	2700mm	3150mm
Kickstrip maximum height	300mm	350mm

## Doors

The doors can be supplied without tubes or with one or two aluminium tubes (Ø16.4 x 18mm) positioned according to customers' specifications.

### Applications

Van bodywork, dryfreight containers.

**Thicknesses:** 20 / 24 / 27 30mm

**Standard width:** 1220 mm

**Special sizes:** on request

**Height:** 2440 / 2600 / 2900 / 3150mm

**Special sizes:** On request

## NAPS Range

Lightweight polypropylene honeycomb core coated on both sides with glassfibre reinforced polyester resin.

### Advantages:

Strong lightweight panel. Excellent resistance to humidity in external uses.

### Types / Glass reinforcement:

**NA45L:** 930g/m<sup>2</sup>

**NAPS:** 930 g/m<sup>2</sup>

**NAP6:** 1230g/m<sup>2</sup>

**NAP7:** 1500 g/m<sup>2</sup>

**Standard height:** 2500mm

**Standard Length:** Approximately 13550 mm

**Maximum height:** 3150mm

(NA45L: Maximum height 2440mm)

**Special sizes:** On request

### Thicknesses and weights

Thickness mm	14	17	20	25	30
Weight kg/m <sup>2</sup> NA45L (lightened issue)	4.2	4.4	4.5	4.8	5.1
Weight kg/m <sup>2</sup> NAPS	5.8	6.0	6.2	6.5	6.8
Weight kg/m <sup>2</sup> NAP6	7.7	7.9	8.1	8.4	8.7
Weight kg/m <sup>2</sup> NAP7	8.3	8.5	8.7	9.0	9.3
Coefficient of insulation w/m <sup>2</sup> /K (NAPS)	5.03	4.37	3.66	2.87	2.37

### Custom-made:

We can provide specific panels according to drawings and also coloured panels. We can also protectively film the panels, make special cuts according to drawing, supply the panels with peel ply, anti-slip flooring. See NIDALIT range on page M14.

**Applications:** This lightweight panel is particularly adapted for lightweight vehicle boxes.

### Aalco stock of NAPS Panels

Thickness (mm)	Length (mm)	Width (mm)	Weight kg
14	2438	2440	25
14	6096	2440	62.5
17	2438	2420	26
17	6096	2420	65

## GRP Liner Panels

These lightweight gel-coated GRP Liner Panels are used in a range of applications including refrigerated vehicles, camper vans and leisure vehicles.

### Aalco stock of GRP Liner Panels

Thickness (mm)	Length (mm)	Width (mm)	Weight kg
4	6096	2440	95

### Custom-made

The ISS and ISP panels can be produced according to your specifications.

**Examples:**

Floor panels with wood or metal reinforcements. Insulated bulkhead panels with wood or metal reinforcements for refrigerator fastening. Insulated roof panels with, on request, stiffeners for the fastening of equipment, or with tubes for electrical wiring.

### ISP

Polyurethane foam panel with 4mm plywood sheets on both sides for an optimal stiffness and a stronger shock resistance.

**Applications**

Insulated bodyworks, isothermal and refrigerated containers.

**Types / Glass reinforcement:**

**ISP:** 950 g/m<sup>2</sup>

**ISP3:** 1100 g/m<sup>2</sup>

**ISP4:** 1530 g/m<sup>2</sup>

**ISP5:** 2130 g/m<sup>2</sup>

**Standard height:** 2500mm

**Maximum height:** 3150mm

**Standard length:** up to 13550mm

**Special sizes:** On request

**Polyurethane-foam density:**

Standard 40 kg/m<sup>3</sup>

**Other density:** On request

Thickness mm	25	30	40	50	80	100	120

Coefficient of insulation w/m <sup>2</sup> /K (NAPS)	5.03	4.37	3.66	2.87	2.37

## NIDALIT NON-SLIP

Lightweight panel with a Polypropylene honeycomb core, coated on one side with glassfibre and the other with anti-slip resin.

### Thicknesses and weights

Thickness mm	17	25	30
Weight kg/m <sup>2</sup> NAPS with anti-slip coating	7.5	8.0	8.3

## PER range

PET foam coated on both sides with glassfibre polyester resin.

### Thicknesses and weights

Thickness mm	14	17	20	25	30
Weight kg/m <sup>2</sup> PER	4.6	4.8	5.1	5.5	5.9
Coefficient of insulation w/m <sup>2</sup> /k (PER)	3.40	2.70	2.25	1.70	1.44

### Advantages:

Strong lightweight panel. Excellent resistance to humidity and external uses.

### Types / Glass reinforcement:

**NA45L:** 930 g/m<sup>2</sup>      **NAP6:** 1230 g/m<sup>2</sup>  
**NAPS:** 930 g/m<sup>2</sup>      **NAP7:** 1500 g/m<sup>2</sup>

**Standard height:** 2500mm  
**Maximum height:** 3150mm  
**Standard length:** up to 13550mm  
**Special sizes:** On request

### Custom-made:

Coloured Panels: Special cuts according to drawings. Peripheral and intermediate wood according to drawings. Panels protected with plastic film upon request. Panels with peel dry, anti-slip coat to realise floors.

### Applications:

Boxes, containers of lightweight vehicles, bottoms of swimming pools.

### Advantages:

Resistant, light and waterproof.

### Types / Glass reinforcement:

**NAPS:** 1800 g/m<sup>2</sup>

**Maximum width:** 2550mm  
**Standard length:** up to 13550mm  
**Special sizes:** On request

### Upon specific request:

With peel ply instead of anti-slip coating.

### Applications:

Floors for lightweight vehicles, construction, footbridges and balconies.

### Advantages

Good resistance to compression.

### Types / Glass reinforcement:

**PER:** 925 g/m<sup>2</sup>

**Standard height:** 2440mm  
**Maximum height:** 3150mm  
**Standard length:** up to 13550mm  
**Special sizes:** On request

### Custom-made:

We can paint, protectively film or cut the panels according to your drawings.

### Applications

Lightweight vehicles.

# N: Aluminium Box Body

---

# 0: Curtainsider Body

---

# P: Innosoft B570 & Innoprotect B580

---

## Rust and corrosion removal, cleaning and polishing on all types of metal.

Although Innosoft B570 was originally developed for stainless steel it has become apparent that it also gives good results on other metals like copper, aluminium and even plain steels. Common corrosion pits on aluminium are also effectively removed using this product.

It is a white viscous liquid based on organic acids and surface active agents and does not contain abrasives. It is suitable for the intensive cleaning of contaminated surfaces like flash rust and rusty areas, also known as 'tea-stains'. It is not a pickling agent because it does not attack the metal. It is therefore non-aggressive for metals but very effective on oxides and dirt.

Innoprotect B580 completely removes any residues left after the use of Innosoft B570 and passivates the surface which helps to prevent further corrosion.

Due to the deep-cleaning characteristics of Innosoft B570, the danger of 'under-deposit corrosion' of stainless steel is also reduced. This form of corrosion occurs under deposits because oxygen access is limited. This is particularly important in Chloride environments such as marine applications. Ground or polished surfaces are also more susceptible to this phenomenon.

### Instructions for using Innosoft B570

Innosoft B570 is a white viscous liquid with an acidic pH of 3 containing organic acids and surface-active agents and is free from abrasive particles.

Innosoft B570 should first be well shaken and then applied undiluted using a damp sponge or pad. For ground or polished finishes, the product should be applied in the same direction as the brushing, grinding, polishing or abrading.

The loosened dirt and or oxide might cause light scratching, particularly on polished surfaces and this should therefore be carefully removed with water or a damp cloth. In this case only light pressure should be used in order to prevent any dirt becoming lodged in surface discontinuities. It is preferable to follow up with use of the basic cleaner Innoprotect B580 which as well as being neutral, also leaves a passive layer minimising the danger of any subsequent corrosion.

It is recommended that waterproof gloves are worn whilst using the product. A Material Safety Data Sheet in line with 1907/2006/EC article 31 is available on request.

### Instructions for using Innoprotect B580

This neutral (pH 6.5) and mild cleaner can successfully be used in combination with Innosoft B570. As well as its cleaning action in removing the loosened oxides and contaminants, this product will also passivate the surface to minimise further corrosion. It is also suitable for the everyday cleaning of lightly soiled surfaces that have previously been treated with Innosoft B570.

### Dilution

Dilute 400ml in 1000ml of cold water.

## Aalco Kits

Kits are available from Aalco comprising the following contents

Product	500ml Kit	250ml Kit	100ml Kit
Innosoft B570	500ml	250ml	100ml
Innoprotect B580	500ml	250ml	100ml

- 400ml co-axial cartridges
- 825ml side by side cartridges
- 20 litre (nominal) pails
- 200 litre (nominal) pails

#### M7 (1:1) Range

- 50ml side by side cartridges
- 400ml side by side cartridges
- 20 litre (nominal) pails
- 200 litre (nominal) pails

## Guide To Bonding

### Metals

Some surface cleaning is required – remove any obvious dirt, grease, oxidation and other contaminants with either acetone, MEK or IPA. Galvanised or zinc coated metals should be bonded using the Crestabond® M7 (1:1) range.

When bonding cold rolled steel (CRS), ensure that the substrate has been cleaned, abraded and then cleaned once more in order to achieve the best results.

Certain metals, such as carbon steel may also require mechanical abrasion and a subsequent alcohol solvent wipe prior to bonding.

### Composites

Some surface cleaning is required – remove any obvious dirt, grease, oxidation and other contaminants with either acetone, MEK or IPA. The laminate should be fully cured prior to bonding and if the laminate surfaces are more than 3 days old, it is recommended that the surface must be cleaned with a suitable solvent or cleaner with a lint-free, clean cloth prior to bonding.

Surface preparation, such as mechanical abrasion, is likely to be needed on gel coat surfaces and moulded surface where release agents are likely to be present. When bonding epoxy laminates please test bond strength prior to application. Gelcoat substrates need to be cleaned and may require a light abrasion with a 100 -140 grit sandpaper. All composites can be bonded with Crestabond®.

### Plastics

Some surface cleaning is required – remove any obvious dirt, grease, oxidation and other contaminants with either acetone, MEK or IPA.

Plastics that cannot be bonded with the Crestabond® range are:

- Polyethylene
- Polypropylene
- Polyacetals
- Polytetrafluoroethylene

## Crestabond® Features

- Primerless and requires minimal surface preparation
- Excellent fatigue and impact resistance
- Range of working and fixture times
- Good gap filling capability

## Customer Benefits

- Dramatically enhances production efficiency and reduces consumable costs
- Reduces dust emissions and preparation time
- Confidence in the longevity of the finished product
- Optimises production cycles to reduce manufacturing costs
- Adhesive can be used in multiple applications

Product	Description	Colour	Mix ratio by volume	Viscosity (cP)	Working time (mins)	Fixture time (mins)	Tensile elongation %	Tensile strength (MPa)	Tensile modulus (MPa)	Gap fill (mm)
M1-04	Universal Bonder	Grey	10:1	100,000 - 140,000	3-5	8-10	70	14-17	400-600	1-15
M1-05	Universal Bonder	Grey or Black	10:1	100,000 - 140,000	4-7	12-18	70	14-17	400-600	1-15
M1-20	Universal Bonder	Grey or Black	10:1	100,000 - 140,000	14-22	25-35	70	16-19	600-850	1-25
M1-30	Universal Bonder	Grey or Black	10:1	200,000 - 240,000	25-35	60-80	>100	17-20	750-1000	1-50

Multiple ticks denote exceptional suitability

### Key points

- Higher or lower working temperatures will cause the working time to decrease or increase
- Static mixers must always be discarded after use
- After specified fixture time, Crestabond® will achieve approximately 85% strength, after 24 hours full cure will be achieved
- Operating temperature of Crestabond® is from -40°C up to 100°C

### Application

Prior to bonding, ensure the substrate surface is clean by following instructions provided. Bulk dispensing equipment should be in good operating condition. Dispense the adhesive at slow rate initially onto a non-bonding surface until the bead colour is uniform opaque grey or black, depending on the adhesive grade. Check the dispensed bead for cure quality before beginning the bonding process. Dispense enough adhesive to fill the bond gap before parts are mated. Avoid dry bonds by using adequate pressure to mate parts and clamp properly to prevent joint movement.

All these processes must be completed before the working time of the mixed adhesive expires. The viscosities of both adhesive and activator are affected by temperature. The adhesive, activator and parts to be bonded should be allowed to attain workshop temperature of between 18°C and 25°C prior to bonding. This temperature should be maintained during the bonding process and until the adhesive is sufficiently cured to allow movement of the assembly.

For industrial/commercial use only. Not to be used in household applications. The user must determine the suitability of a selected adhesive for a given substrate and application. This product is intended for use by skilled individuals at their own risk.

The Crestabond® cartridges can be applied using a manual or pneumatic gun. Suitable manual and pneumatic guns plus static mixers are available to purchase.

### Bonding checklist

- Product is within shelf life
- Cartridge has been stored correctly
- No obvious defect or damage to cartridge
- No blockages within the cartridge
- Correct static mixing nozzle is being used
- If adhesives and activator are mixed correctly, colours should be as follows;

M1 (10:1) - Grey  
 M1 Black (10:1) - Black  
 M7 (1:1) - Off White  
 M7 Black (1:1) - Black

### Storage

The shelf life for Crestabond® is defined from date of manufacture when stored at a recommended temperature between 2°C and 23°C. Long term exposure above 23°C will reduce the shelf life of these materials. Crestabond® products should be stored in their original container out of direct sunlight. The bulk product or cartridge material should be opened only immediately prior to use and it's highly recommended that products should never be frozen or exposed to temperatures above 35°C. The expiry date is indicated on the product labels.

### How to order bulk packed materials

Product	Adhesive (pails or drums)	Activator (pails only)
M1-04	M1-05 Adhesive	Activator 4
M1-05	M1-05 Adhesive	Activator 1 or Activator 1 Black
M1-20	M1-20 Adhesive	Activator 1 or Activator 1 Black
M1-30	M1-30 Adhesive	Activator 1 or Activator 1 Black
M1-60	M1-60/90HV Adhesive	Activator 2
M1-90HV	M1-60/90HV Adhesive	Activator 3
M7-05	M7-05 Adhesive	M7-05/15 Activator
M7-15	M7-15 Adhesive	M7-05/15 Activator
